

# VINAY SHARMA

## JAVA FULL STACK DEVELOPER

Ujjain, India | [vinaysharma71984@gmail.com](mailto:vinaysharma71984@gmail.com) | +91 6265355179 | [linkedin.com/in/vinay-sharma-35b683359/](https://www.linkedin.com/in/vinay-sharma-35b683359/) | <https://vinayportfolio0.netlify.app/>

### Summary

---

Enthusiastic and detail-oriented Full Stack Java Developer with knowledge of HTML, CSS, JavaScript (ES6), React.js, Redux Toolkit, Java, J2EE, JSP, Servlets, JDBC, MVC, Spring boot, Hibernate and MySQL. Skilled in building responsive and interactive web interfaces with modern front-end technologies and strong back-end logic using Java. Good understanding of OOP concepts, MVC architecture, and frontend-backend integration. Familiar with Firebase for real-time data handling and authentication. Also proficient in C and C++, with a solid foundation in programming principles. Eager to contribute to real-world projects and grow as a developer by creating efficient, user-friendly, and scalable web applications.

---

### Skills

---

- **Programming Languages:** HTML, CSS, JavaScript (ES6), Java SE, Java EE.
- **Tools:** Postman, Eclipse, VS Code.
- **Frameworks & Libraries:** React.js.
- **Backend & Web Technologies:** JDBC, Servlet, JSP, Firebase, MVC, Spring Boot, Hibernate.
- **Programming Fundamentals:** OOP.

### Projects (5+)

---

#### Weather app (Website)

- Developed a responsive weather application using React.js, JavaScript (ES6), HTML, and CSS.
- Integrated a public weather API to display real-time data and implemented dynamic UI updates for enhanced user experience.

#### Personal Portfolio (Website)

- Created a personal portfolio website using React.js, HTML, CSS, JavaScript and Firebase.
- Showcased projects, technical skills, certifications, and contact information through an interactive interface.
- Optimized website responsiveness and performance to ensure a seamless user experience across devices.

#### Todo app (Website)

- Built a responsive task management application using React.js, JavaScript (ES6), HTML, and CSS.
- Implemented features to add, update, and delete tasks with efficient state management for smooth user interaction across devices.

#### Hospital Management System (Web Application)

- Developed a Hospital Management System using Java Servlets, JDBC, MySQL, Bootstrap, HTML, CSS and JSP.
- Implemented modules for patient registration, appointment booking, doctor management, and medical record.
- Designed a responsive and efficient web interface to streamline hospital operations and improve data management.

## Product Management System (Web Application)

- Built a full-stack Product Management System using Java Servlets, JDBC, MySQL, Bootstrap, HTML, CSS and JSP.
- Enabled efficient product, inventory, and category management through a centralized web platform.
- Improved operational efficiency with real-time data management and a responsive user interface.
